Cells

Macfelda, K., Holly, A., & Mueller, J. (2015). Significant Enhancement of ATP-Synthesis in Cardiomyocytes By Electric Microcurrent. *Journal of Cardiac Failure, 21(8), 519.*

Cheng, N., van Hoof, H., Bockx, E., Hoogmartens, M. J., Mulier, J. C., de Dijcker, F. J., Sansen, W. M., & de Loecker, W., (1982). The effects of electric currents on ATP generation, protein synthesis, and membrane transport in rat skin. *Clin orthop relat res, 171, 264-272.*

Lohrasebi, A., Jamali, Y., & Rafii-Tabar, H. (2008). Modeling the effect of external electric field and current on the stochastic dynamics of ATPase nano-biomolecular motors. *Physica A: Statistical Mechanics and its Applications, 387(22), 5466-5476.*

Kwon, D. R., Kwon, H., Lee, W. R., & Park, J. (2016). Investigating effects of nano-to micro-ampere alternating current stimulation on *Trichophyton rubrum* growth. *Annals of Dermatology, 28(5), 575-578.*

Pain

Tan, G., Alvarez, J. A., & Jensen, M. P. (2006). Complementary and alternative medicine approaches to pain management. *Journal of Clinical Psychology, 62(11), 1419-1431.*

Chronic Pain

Holubec, J. T. (2009). Cumulative response from cranial electrotherapy stimulation (CES) for chronic pain. *Practical Pain Management, 9, 80-83.*

Lerner, F. N., & Kirsch, D. L. (1981). A double blind comparative study of microstimulation and placebo effect in short term treatment of the chronic back pain patient. *Journal of American Chiropractic Association, 15, 101-106.*

Koopman, J. S., Vrinten, D. H., & van Wijck, A. J. M. (2009). Efficacy of microcurrent therapy in the treatment of chronic nonspecific back pain: a pilot study. *The Clinical journal of pain, 25(6), 495-499.*

Zimmerman, S. I., & Lerner, F. N. (1989). Biofeedback and electromedicine, reduce the cycle of pain-spasm-pain in low-back patients. *American Journal Of Electromedicine, 108-120.*

Kulkarni, A. D. (2001). The use of microcurrent electrical therapy and cranial electrotherapy stimulation in pain control. *Clinical Practice of Alternative Medicine, 2, 99-103.*

McMakin, C. (1998). Microcurrent treatment of myofascial pain in the head, neck, and face. *Topics in Clinical Chiropractic, 5(1), 29-35.*

Zuim, P. R. J., Garcia, A. R., Turcio, K. H. L., & Hamata, M. M. (2006). Evaluation of microcurrent electrical nerve stimulation (MENS) effectiveness on muscle pain in temporomandibular disorders patients. *Journal of Applied Oral Science, 14(1), 61-66.*

Dertinger, H., Henke, R., & Mikus, E. W. J. (2003). Frequenzmodulierte Wechselströme sind erfolgreich in der Therapie des Morbus Sudeck. *Archives for Sensology and Neurootology in Science and Practice, 1.*

Chevalier, A., Armstrong, K., & Gokal, R. (2016). Microcurrent point stimulation applied to acupuncture points for the treatment of non-specific lower back pain. *J Altern Complement Integr Med, 2(2).*

Chapman-Jones, D., & Hill, D. (2002). Novel microcurrent treatment is more effective than conventional therapy for chronic Achilles tendinopathy: randomised comparative trial. *Physiotherapy, 88(8), 471-480.*

Tan, G., Rintala, D. H., Thornby, J. I., Yang, J., Wade, W., & Vasilev, C. (2006). Using cranial electrotherapy stimulation to treat pain associated with spinal cord injury. *Journal of Rehabilitation Research and Development, 43(4), 461-474.*

Tan, G., Rintala, D. H., Jensen, M. P., Richards, J. S., Holmes, S. A., Parachuri, R., ... & Price, L. R. (2011). Efficacy of cranial electrotherapy stimulation for neuropathic pain following spinal cord injury: a multi-site randomized controlled trial with a secondary 6-month open-label phase. *The Journal of Spinal Cord Medicine*, 34(3), 285-296.

Postoperative Pain

Sarhan, T. M., & Doghem, M. A. (2009). Effect of microcurrent skin patch on the epidural fentanyl requirements for post operative pain relief of total hip arthroplasty. *Middle East J Anesthesiol*, 20(3), 411-416.

Lee, S. H., Kim, W. Y., Lee, C. H., Min, T. J., Lee, Y. S., Kim, J. H., & Park, Y. C. (2013). Effects of cranial electrotherapy stimulation on preoperative anxiety, pain and endocrine response. *Journal of International Medical Research*, 41(6), 1788-1795.

Gabriel, A., Sobota, R., Gialich, S., & Maxwell, G. P. (2013). The use of targeted microcurrent therapy in postoperative pain management. *Plastic Surgical Nursing*, 33(1), 6-8.

Arthritis

Chung, J., & Cho, N. (2015). Micro-current treatment effects on pain, balance of the degenerative knee arthritis. *Journal of The Korean Society of Integrative Medicine*, 3(2), 9-16.

Kaya Mutlu, E., Ercin, E., Razak Ozdincler, A., & Ones, N. (2018). A comparison of two manual physical therapy approaches and electrotherapy modalities for patients with knee osteoarthritis: A randomized three arm clinical trial. *Physiotherapy theory and practice*, 34(8), 600-612.

Fibromyalgia

Cork, R. C., Wood, P., Ming, N., Clifton, S., James, E., & Price, L. (2004). The effect of cranial electrotherapy stimulation (CES) on pain associated with fibromyalgia. *The Internet Journal of Anesthesiology*, 8(2).

Lichtbroun, A. S., Raicer, M. M. C., & Smith, R. B. (2001). The treatment of fibromyalgia with cranial electrotherapy stimulation. *JCR: Journal of Clinical Rheumatology*, 7(2), 72-78.

Headache

Brotman, P. (1989). Low-intensity transcranial electrostimulation improves the efficacy of thermal biofeedback and quieting reflex training in the treatment of classical migraine headache. *American Journal of Electromedicine*, 6(5), 120-123.

Solomon, S., Elkind, A., Freitag, F., Gallagher, R. M., Moore, K., Swerdlow, B., & Malkin, S. (1989). Safety and effectiveness of cranial electrotherapy in the treatment of tension headache. *Headache*, 29(7), 445-450.

Muscle Function

Kwon, D. R., Kim, J., Kim, Y., An, S., Kwak, J., Lee, S., ... & Park, J. W. (2017). Short-term microcurrent electrical neuromuscular stimulation to improve muscle function in the elderly: A randomized, doubleblinded, sham-controlled clinical trial. *Medicine*, 96(26).

Muscle Pain

Ho, L. O., Kwong, W. L., & Cheing, G. L. Y. (2007). Effectiveness of microcurrent therapy in the management of lateral epicondylitis: a pilot study. *Hong Kong Physiotherapy Journal*, 25(1), 14-20.

Muscle Fatigue and Soreness

Welch, M. (1992). Effects of microcurrent therapy on delayed onset muscle soreness. *Medicine & Science in Sports & Exercise*, 24(5), 146.

Curtis, D., Fallows, S., Morris, M., & McMakin, C. (2010). The efficacy of frequency specific microcurrent therapy on delayed onset muscle soreness. *Journal of bodywork and movement therapies*, 14(3), 272-279.

Allen, J. D., Mattacola, C. G., & Perrin, D. H. (1999). Effect of microcurrent stimulation on delayed-onset muscle soreness: a double-blind comparison. *Journal of Athletic Training*, 34(4), 334-337.

Kang, D. H., Jeon, J. K., & Lee, J. H. (2015). Effects of low-frequency electrical stimulation on cumulative fatigue and muscle tone of the erector spinae. *Journal of physical therapy science*, 27(1), 105-108.

Wound Healing

Lee, B. Y., Wendell, K., Al-Waili, N., & Butler, G. (2007). Ultra-low microcurrent therapy: a novel approach for treatment of chronic resistant wounds. *Advances in Therapy*, 24(6), 1202-1209.

Baker, L. L., Rubayi, S., Villar, F., & Demuth, S. K. (1996). Effect of electrical stimulation waveform on healing of ulcers in human beings with spinal cord injury. *Wound Repair and Regeneration*, 4(1), 21-28.

Baker, L. L., Chambers, R., DeMuth, S. K., & Villar, F. (1997). Effects of electrical stimulation on wound healing in patients with diabetic ulcers. *Diabetes care*, 20(3), 405-412.

Huckfeldt, R., Mikkelson, K., & Larson, L. (2003, February). The use of microcurrent and autocatalytic silver plated nylon dressings in human burn patients: a feasibility study. *In Maui, Hawaii: Proceedings of John Boswick Burn and Wound Symposium*.

Sarhan, T. M., & Doghem, M. A. (2009). Effect of microcurrent skin patch on the epidural fentanyl requirements for post operative pain relief of total hip arthroplasty. *Middle East J Anesthesiol*, 20(3), 411- 416.

Anxiety

Barclay, T. H., & Barclay, R. D. (2014). A clinical trial of cranial electrotherapy stimulation for anxiety and comorbid depression. *Journal of Affective Disorders*, 164, 171-177.

Bystritsky, A., Kerwin, L., & Feusner, J. (2008). A pilot study of cranial electrotherapy stimulation for generalized anxiety disorder. *Journal of Clinical Psychiatry*, 69(3), 412-417.

Gibson, T. H., & O'Hair, D. E. (1987). Cranial application of low level transcranial electrotherapy vs. relaxation instruction in anxious patients. *American Journal of Electromedicine*, 4(1), 18-21.

Kim, H. J., Kim, W. Y., Lee, Y. S., Chang, M. S., Kim, J. H., & Park, Y. C. (2008). The effect of cranial electrotherapy stimulation on preoperative anxiety and hemodynamic responses. *Korean Journal of Anesthesiology*, 55(6), 657-661.

Overcash, S. J. (1999). Cranial electrotherapy stimulation in patients suffering from acute anxiety disorders. *American Journal of Electromedicine*, 30, 49-52.

Schmitt, R., Capo, T., & Boyd, E. (1986). Cranial electrotherapy stimulation as a treatment for anxiety in chemically dependent persons. *Alcoholism: Clinical and Experimental Research*, 10(2), 158-160.

Winick, R. L. (1999). Cranial electrotherapy stimulation (CES): a safe and effective low cost means of anxiety control in a dental practice. *General Dentistry*, 47(1), 50-55.

Yixin, C., Lin, Y., Jiuping, Z., Lejia, L., Tunong, C., & Yi, C. (2007). Results of cranial electrotherapy stimulation to children with mixed anxiety and depressive disorder. *Shanghai Archives of Psychiatry*, 19(4), 203-205.

Lee, S. H., Kim, W. Y., Lee, C. H., Min, T. J., Lee, Y. S., Kim, J. H., & Park, Y. C. (2013). Effects of cranial electrotherapy stimulation on preoperative anxiety, pain and endocrine response. *Journal of International Medical Research*, 41(6), 1788-1795.

Depression

Gunther, M., & Phillips, K. D. (2010). Cranial electrotherapy stimulation for the treatment of depression. *Journal of psychosocial nursing and mental health services*, 48(11), 37-42.

Kavirajan, H. C., Lueck, K., & Chuang, K. (2014). Alternating current cranial electrotherapy stimulation (CES) for depression. *Cochrane Database of Systematic Reviews*, 7. Yixin, C., Lin, Y., Jiuping, Z., Lejia, L., Tunong, C., & Yi, C. (2007). Results of cranial electrotherapy stimulation to children with mixed anxiety and depressive disorder. *Shanghai Archives of Psychiatry*, 19(4), 203-205.

Barclay, T. H., & Barclay, R. D. (2014). A clinical trial of cranial electrotherapy stimulation for anxiety and comorbid depression. *Journal of Affective Disorders*, 164, 171-177.

Gilula, M. F., & Kirsch, D. L. (2005). Cranial electrotherapy stimulation review: a safer alternative to psychopharmaceuticals in the treatment of depression. *Journal of Neurotherapy*, 9(2), 7-26.

Roh, H. T., & So, W. Y. (2017). Cranial electrotherapy stimulation affects mood state but not levels of peripheral neurotrophic factors or hypothalamic-pituitary-adrenal axis regulation. *Technology and Health Care*, 25(3), 403-412.

Stress

Mellen, R. R., & Mackey, W. (2008). Cranial electrotherapy stimulation (CES) and the reduction of stress symptoms in a sheriff's jail security and patrol officer population: A pilot study. *American Jails*, 22, 32-38.

Phobias

Smith, R. B., & Shiromoto, F. N. (1992). The use of cranial electrotherapy stimulation to block fear perception in phobic patients. *Current Therapeutic Research*, 51(2), 249-253.

Learning

Madden, R. E., & Kirsch, D. L. (1987). Low intensity transcranial electrostimulation improves human learning of a psychomotor task. *American Journal of Electromedicine*, 2, 41-45.

Attention, Concentration

Southworth, S. (1999). A study of the effects of cranial electrical stimulation on attention and concentration. *Integrative Physiological and Behavioral Science*, 34(1), 43-53.

Insomnia

Lande, R. G., & Gragnani, C. (2012). Efficacy of cranial electric stimulation for the treatment of insomnia: a randomized pilot study. *Complementary therapies in medicine*, 21(1), 8-13.

Barabasz, A. F. (1976). Treatment of insomnia in depressed patients by hypnosis and cerebral electrotherapy. *American Journal of Clinical Hypnosis*, 19(2), 120-122.

Skin Care

Saniee, F., Shirazi, H. R. G., Kalantari, K. K., Yazdanpanah, P., Soltani, A. R., Dabiri, N., Shirazi, N. G., & Karimpour, F. (2012). Consider of micro-current's effect to variation of facial wrinkle trend, randomized clinical trial study. *Life Science Journal*, 9(3), 1184-1189.

Jain, S., & Arora, M. (2012). Effect of microcurrent facial muscle toning on fine wrinkles & firmness of face. *IAMR Journal of Physiotherapy*, 1(1), 13-19.

Kern, D., Riggs, M., & Knaggs, H. (2019). A Novel Microcurrent Device to Improve Skin Structure and Appearance. *Journal of Investigative Dermatology*, 139(9), 329.

Aggression

Childs, A. (2005). Cranial electrotherapy stimulation reduces aggression in a violent retarded population: a preliminary report. *The Journal of neuropsychiatry and clinical neurosciences*, 17(4), 548-551.

Cravings

Eidelman, W. S. (2009). Control of cigarette cravings with cranial electrotherapy stimulation. *The Townsend Letter for Doctors*, 311(6), 81-85.

Macular Degeneration

Chaikin, L., Kashiwa, K., Bennet, M., Papastergiou, G., & Gregory, W. (2015). Microcurrent stimulation in the treatment of dry and wet macular degeneration. *Clinical Ophthalmology*, 9, 2345-2353.

Joints

Bertolucci, L. E., & Grey, T. (1995). Clinical comparative study of microcurrent electrical stimulation to mid-laser and placebo treatment in degenerative joint disease of the temporomandibular joint. *The Journal of Craniomandibular Practice*, 13(2), 116-120.

Fibrosis

Lennox, A. J., Shafer, J. P., Hatcher, M., Beil, J., & Funder, S. J. (2002). Pilot study of impedance-controlled microcurrent therapy for managing radiation-induced fibrosis in head-and-neck cancer patients. *Int. J. Radiation Oncology Biol. Phys*, 54(1), 23-34.

Bones

Richez, J., Chamay, A., & Biéler, L. (1972). Bone changes due to pulses of direct electric microcurrent. *Virchows Archiv A*, 357, 11-18.

Postoperative rehabilitation

Rockstroh, G., Schleicher, W., & Krummenauer, F. (2010). Effectiveness of microcurrent therapy as a constituent of post-hospital rehabilitative treatment in patients after total knee alloarthroplasty - a randomized clinical trial. *Die Rehabilitation*, 49(3), 173-179.
