# HealAdvisor Analyse App Guide

## **Notice:**

Information Field technology is a proprietary technology of Healy World. It is based on the theory that the Information Field is the non-material area through which spirit and matter communicate. It reflects what we consider to be the spiritual meaning of life events. The existence of such a field is discussed in scientific literature.

Analysis in the Information Field is designed to search for the information patterns that contribute to the harmonization of the Information Field. For this purpose, a priority is assigned to contents such as descriptive sentences, arranged in lists, by evaluating the data of a physical noise generator. In our users' experience, this priority reflects the relevance for the user.

An analysis in the Information Field reflects a combination of factors at the time the analysis is done, including the intention of the user. An analysis at a different time may have a different result due to changes in the environmental variables.

The content of the HealAdvisor Analyse app databases and modules is based on the practical experience of the experts who created them.

We have conducted unblinded before/after surveys in controlled and randomized groups of participants. These surveys suggest that the participants' wellbeing was higher after the application. We attribute this to the harmonization of the Information Field, which we refer to as the unified background field of the material and the mental dimensions.

They have not been confirmed by independent studies.

The analysis and harmonization in the Information Field is not intended to cure, treat, mitigate, diagnose or prevent any disease or medical condition. It is intended to give the user the option, in a holistic context, to derive helpful information from findings from the Information Field. Each user should determine, based on their own experience, whether the application seems to be helpful to them or not.

The terms used in the databases and modules do not constitute statements concerning their effects. Information from the Healy device should always be critically questioned and, if necessary, verified with further procedures. It should not be treated as a substitute for professional medical advice, diagnosis or treatment. You should always seek such advice from a qualified medical professional.

# 1. Download

You can download the HealAdvisor Analyse App free of charge from the Apple App Store and the Google Play Store. To start the download on an Apple device, tap on the "Download Cloud or Install" icon in the upper right corner, see **Figure 1.1**. For an Android device, tap on the "Install" button, see **Figure 1.2**

Once the download and installation of the HealAdvisor Analyse App is successfully completed, start the app.

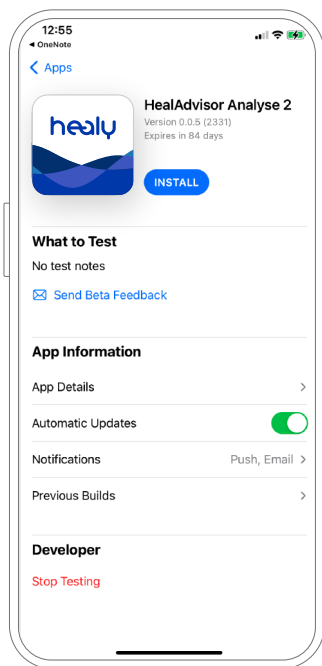

Figure 1.1: Apple App Store

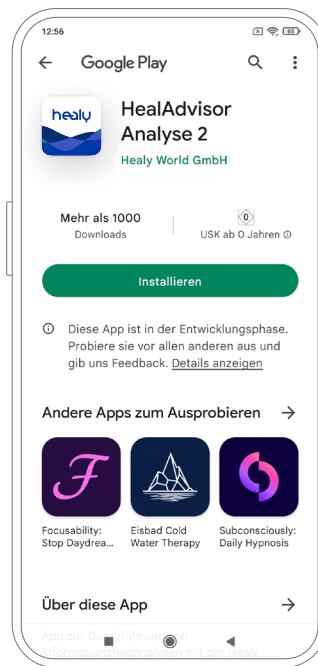

Figure 1.2: Google Play Store

## 2. Login and Verification

After reading the Disclaimer screen, you land on the login screen, see **Figure 2.1**. Agreeing to our legal terms is mandatory, after which the button to log in will be activated. Clicking the button will redirect you to the Healy Login web view, as we use single sign-on, see **Figure 2.2**. Once you have successfully signed in, you are presented with the verification screen, see **Figure 2.3**. A verification code will be automatically sent to your email address. Enter the 6-digit verification code into the verification code field in the HealAdvisor Analyse App and tap 'submit'. If there a mistake is made while entering the verification code, you can try entering it again. If by any chance the verification code is invalid, has expired or not yet arrived, you can request a new verification code to be sent to your email address. Alternatively, you can go back to restart the login process or log in with another account.

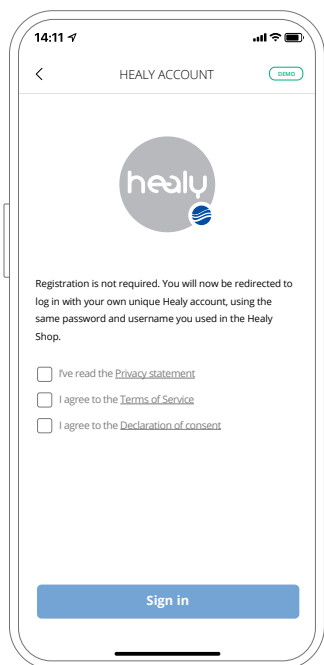

Figure 2.1: Login screen

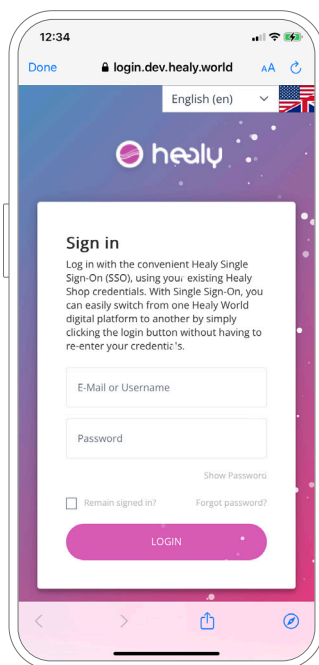

Figure 2.2: Healy Login webview

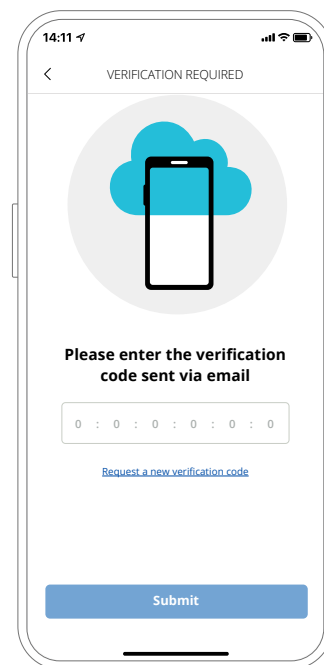

Figure 2.3: Verification screen

### 2.1. Demo Mode

On the login screen, you can enter the demo mode by tapping on the demo icon in the top right corner.

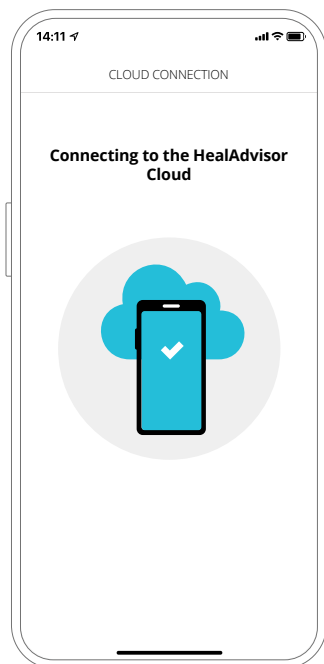

The demo mode was created to test the app for a limited time. All data that is being created during demo mode will be completely cleared after logout, as well as when the demo period is over. The remaining demo time is displayed in a banner on the user dashboard.

The modules and databases displayed depend on the activation of the connected Healy device.

## 3. Healy Cloud Data Storage

All data that is created in the app such as clients, profile information and analysis lists is encrypted and stored in the HealAdvisor Cloud. An exception is the data created in demo mode, which is only stored locally on the user's mobile device.

When you download the app for the first time, a connection to the HealAdvisor Cloud will be created, see **Figure 3.1**. When changes are carried out in the cloud, e.g. adding a new program, synchronization is automatically started to always provide you with the newest data. It is therefore necessary to have an active and fast internet connection during the first use of the app.

**Figure 3.1:** Connection to the HealAdvisor Cloud

### 3.1. Offline Support

Once you are logged in and all the required databases are downloaded, the main functions also work without an internet connection. Of course, data can't be synchronized in this case. In order to receive updates from the app and ensure your data will be safely synced to the cloud, we highly recommend activating the internet connection regularly.

# 4. Me and Clients Dashboards

## 4.1. Me Dashboard

The “Me” dashboard is the main dashboard screen, see **Figure 4.1**. This is where you can access your profile data by tapping the icon on the top left corner, connect to your Healy device and check its status on the top right corner, run analyses for your activated modules and check your own analysis history.

This is also where important notifications will be displayed in a blue banner on top of the screen.

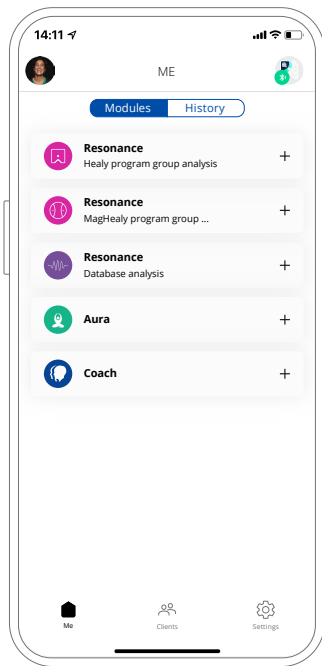

Figure 4.1: “Me” dashboard screen

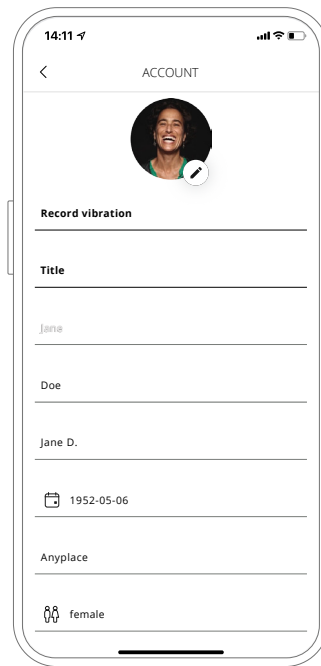

Figure 4.1.1: Account profile view

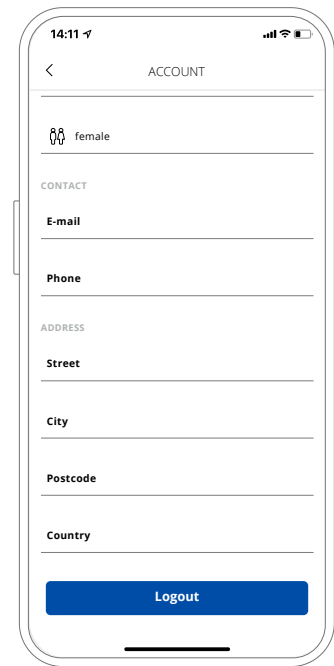

Figure 4.1.2: Account logout

### 4.1.1. Account Profile

In the account profile view (see **Figure 4.1.1**) you can review and edit your personal information or log out of the account (see **Figure 4.1.2**.) Please note that your main information fields such as gender are synchronized with your general Healy user account and can only be changed in the Healy shop or by submitting a support ticket. The account profile can also be accessed through Settings – Account.

Menu items:	Description
Personal data	
Add/edit profile photo	To add your profile photo, tap the + icon on the silhouette and either take a photo directly with your camera by selecting "Use Camera" or select a photo from your gallery using the "Upload" option, see <b>Figure 4.1.3</b> For both options a permission pop-up is displayed, asking you to grant access.
Record vibration	Here you can record the specific vibration pattern. Click on the + icon and follow the instructions, see <b>Figure 4.1.4</b> . You might receive a connection prompt if your Healy device is not connected, see <b>Figure 4.1.5</b>
Title	You can enter your title here.
First name	Healy account information – cannot be edited
Last name	Healy account information – cannot be edited
Display as	Enter the name which you wish to be displayed here. The field is automatically prefilled with first and last name, but can be edited.
Date of birth	You can enter your date of birth here.
Place of birth	You can enter your place of birth here.
Gender	Healy account information – can be edited in the Healy backoffice
E-mail	Here you can enter your email address.
Phone	You can enter your phone number here.
Street	Healy account information – cannot be edited
City	Healy account information – cannot be edited
Postcode	Healy account information – cannot be edited
Country	Healy account information – cannot be edited
Log out	You can log out of your account and be redirected the login view.

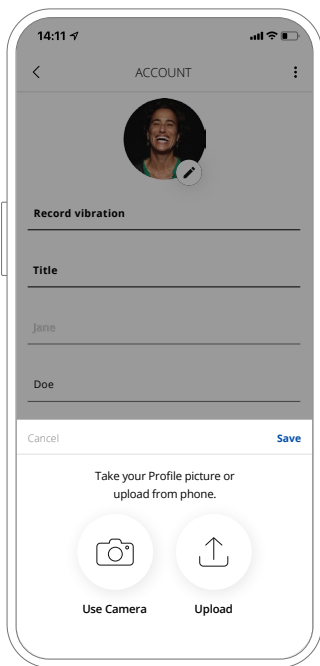

Figure 4.1.3: Add a profile photo

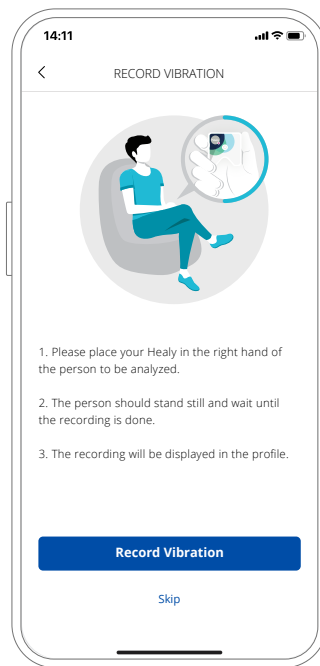

Figure 4.1.4: Record Vibration

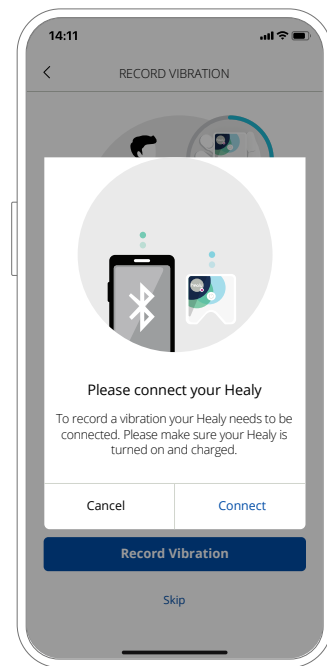

Figure 4.1.5: Connecting with your Healy

## 4.2. Clients Overview

Via the “Clients” bottom navigation tab you can access the overview of all your clients. You can choose to view the clients either in gallery view, see **Figure 4.2**, or in list view, see **Figure 4.3**.

To find a client, you can search the client by tapping the search icon on the top right corner or use the A-Z bar on the left side.

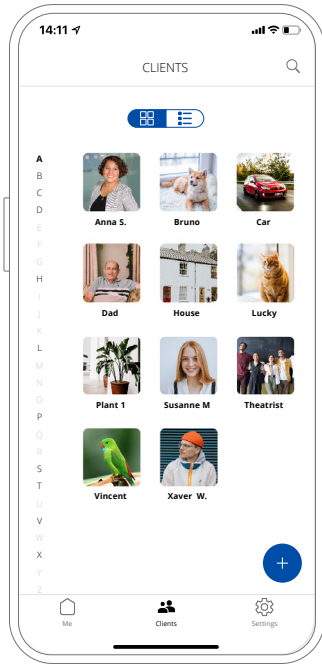

Figure 4.2: Clients gallery view

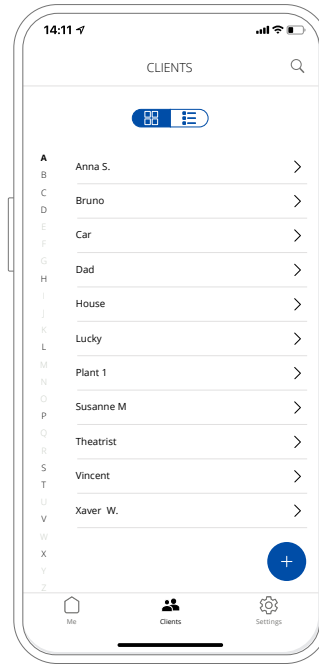

Figure 4.3: Clients list view

### 4.2.1. Adding a Client

To add a new client, tap on the + icon in the bottom right corner. You can choose a client type from the following list: Person, Animal, Plant, Organization, Building, Vehicle, Group or Other, see **Figure 4.4.1**. After selecting the client type, you will be asked to type in the mandatory information and add an optional photo, e.g., for a person, see **Figure 4.4.2**. In a next step, you can record their vibration, see **Figure 4.4.3**. Your client data is automatically saved when you proceed to the next screen, where you can add any other information in the available fields. The type of personal information that can be entered depends on the client type. For a person, see **Figure 4.4.4**.

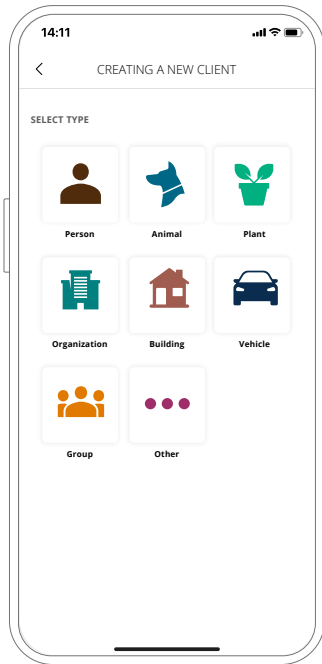

Figure 4.4.1: Creating a new client

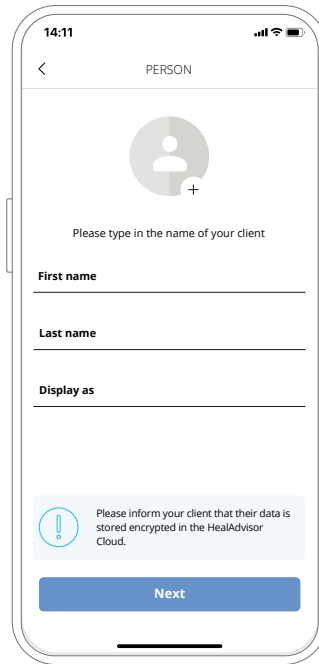

Figure 4.4.2: Create new client – person

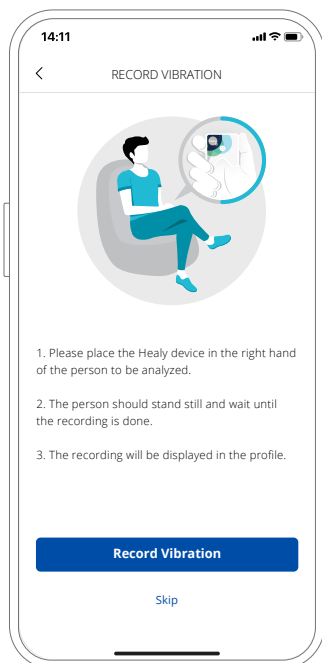

Figure 4.4.3: Record vibration

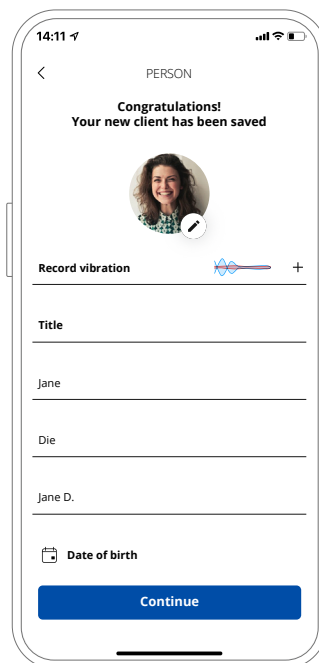

Figure 4.4.4: Profile of a newly created client

### 4.2.2. Clients Dashboard

If you have selected a client from the overview, you access this client's dashboard, see **Figure 4.5**, to run analyses and check their history. You also have access to the client's profile to add/edit information or delete the client.

#### *Edit client*

To edit a client, go to the Clients dashboard and tap on the "Profile" tab in the middle, see **Figure 4.5.1**. Edit the existing data in the text fields. Any modified data will be automatically saved.

#### *Deleting a client*

To delete a client, go to the Clients dashboard, select a client and tap on the trash can icon in the top right corner, see **Figure 4.5.2**. After making sure that you really wish to delete this client, the client will be removed from the HealAdvisor Analyse App; it cannot be restored.

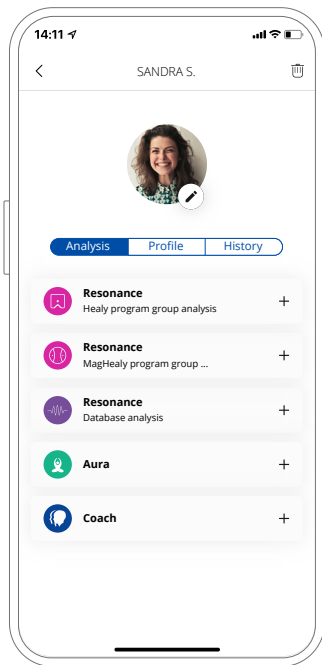

Figure 4.5: Client dashboard

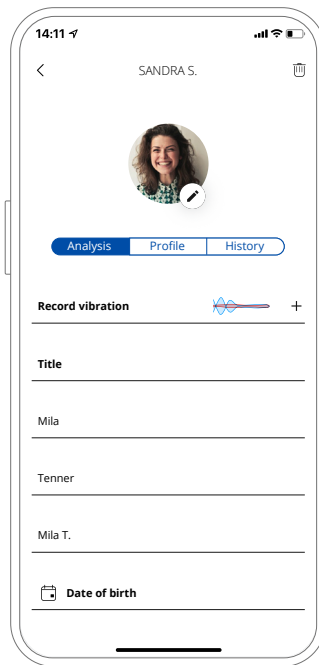

Figure 4.5.1: Edit client

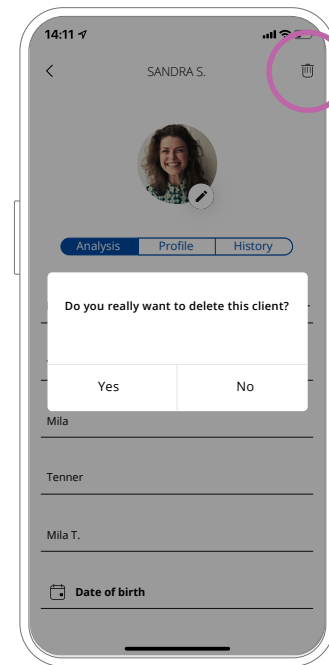

Figure 4.5.2: Delete a client

# 5. Modules

The modules can be found both in the Me dashboard and in each Client dashboard, see **Figure 5.1** and **Figure 5.2**. This dashboard shows you both the modules that you have access to and the modules that you do not have access to (these are displayed with a lock icon), based on the activation of the connected Healy device. On this screen, you can start a new analysis by tapping on the + icon of the respective module or check the previous analysis history of a specific module by tapping on the respective module card.

Depending on your Healy device activation, you can perform analyses in the following modules, for example:

- Resonance → Healy program groups
- Resonance → MagHealy program groups
- Resonance → Database analysis
- Aura
- Coach

The activation will be stored and displayed the next time you open the app. As soon as you connect a new Healy device, its activation will be immediately updated.

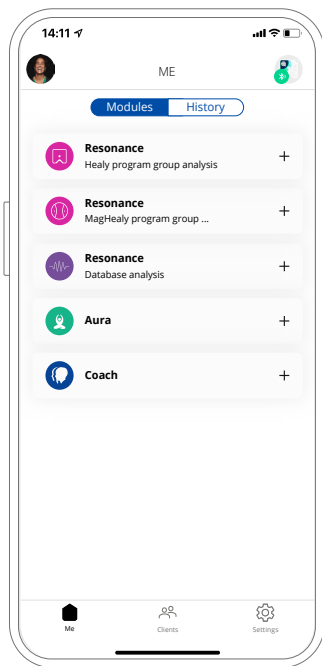

Figure 5.1: Me dashboard

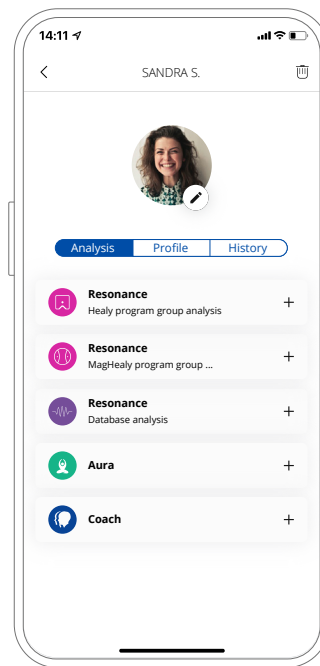

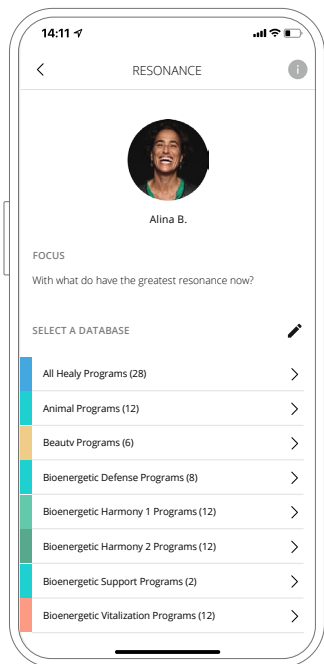

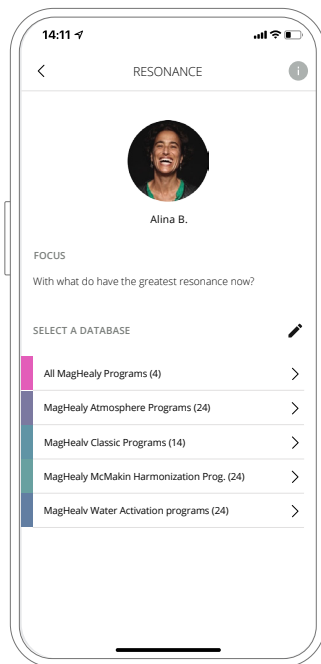

Figure 5.2: Client dashboard

## 5.1. Resonance

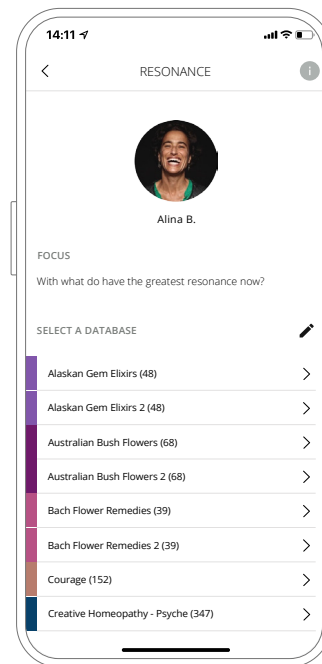

With the Resonance module you can perform analyses in the Information Field to determine your or your client's highest resonance with selected programs or topic specific databases. The module is divided into Resonance analysis of Healy program groups, Resonance analysis of MagHealy program groups and Resonance analysis of databases. The first section contains all Healy programs, the second all MagHealy programs and the third a variety of specific databases. See **Figures 5.3.1, 5.3.2 and 5.3.3.**

**Figure 5.3.1** Healy program groups overview

**Figure 5.3.2** MagHealy program groups overview

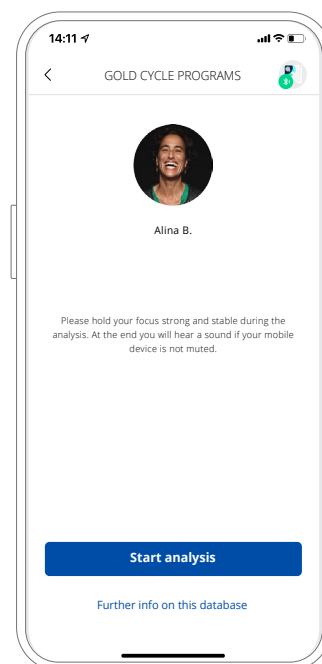

**Figure 5.3.3** Databases overview

To start a new analysis, tap the + icon in the module card. If you click directly on the module card, you can access the old analysis lists.

In all modules you will find a list of databases to select from. If you tap on the pen icon, you can reorder the list according to your preferences and save the changes for yourself, for one or for all clients.

For Resonance analyses, the focus text is set to “With what do I have the greatest resonance now?” by default, which cannot be changed. On the same screen you can read more information about the purpose of this module by tapping the information icon in the upper right corner.

Once you have selected a database, you can start an analysis or read more information about this database, see **Figure 5.3.4.**

**Figure 5.3.4:** Analysis preparation view

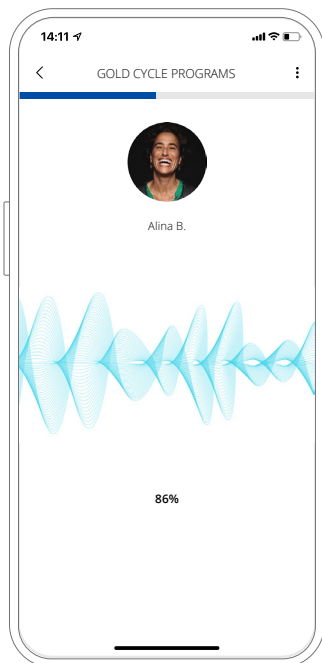

### Analysis

After tapping on the “Start Analysis” button, the analysis will start (if your Healy device is connected; otherwise, the connection process will be initiated), see **Figure 5.4**. During the analysis, hold your focus! If your mobile device is not muted, you will hear a sound after the analysis is completed.

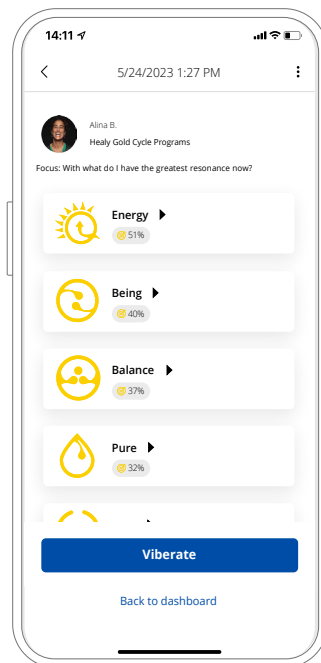

You will be shown 5 analysis results, sorted by relevance in descending order, see **Figure 5.5**. Tap on the relevance tag if you want a detailed explanation.

On the analysis result screen, you can choose to vibrate the list into the Information Field, run the Healy program in the Healy App via the play button or go back to dashboard. In the MagHealy results list, you will only see the play button to start the program in the Healy App if you have a MagHealy device.

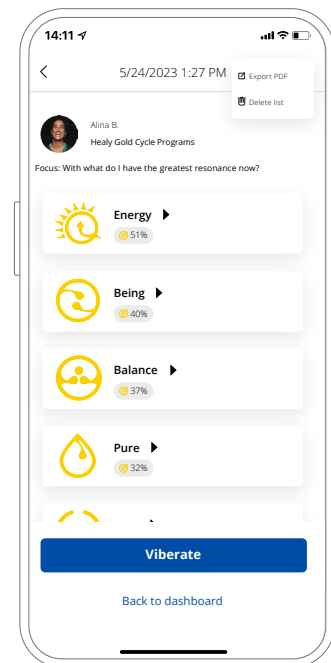

You can also export the list as a PDF or delete the list by tapping on the three dots menu in the top right corner, see **Figure 5.6**

**Figure 5.4:** Resonance analysis in progress

**Figure 5.5:** Resonance analysis Healy programs results

**Figure 5.6:** Export list as a PDF

## 5.2. Aura

The Aura Module allows you to analyze the energy of each chakra in the Information Field for yourself or your clients and then perform a deeper analysis in the chakra-specific databases of the selected chakras.

### Aura recording

To start a new analysis, tap the + icon in the card. You can choose to start the aura analysis or to read more information about the module, see **Figure 5.6.1**. If you press the “Continue” button, the analysis will start if your Healy device is connected to the HealAdvisor Analyse App.

If you or the client do not have a profile photo, a notification will prompt you to add one, as this is mandatory for an aura analysis.

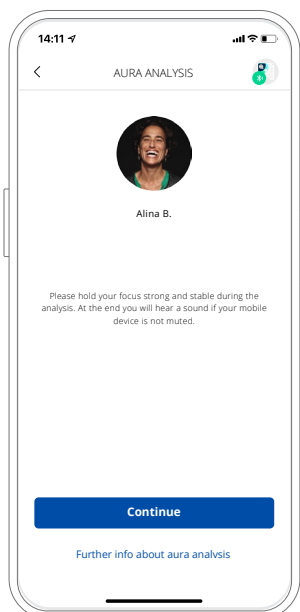

After the aura analysis is completed, your chakra image and results are displayed, see **Figure 5.6.2**. By tapping the info icon in the top bar, you can find further options such as information about or deleting of these results. In the chakra image you can see the energy level of each chakra. The larger the color, the stronger the chakra. The exact values can be seen in the cards below.

You can read more about the interpretation of specific chakras by tapping the chakra cards. For the selected chakras it is indicated whether they are in the coherence state of “Chaos” or “Rigor”. You can tap on the respective tags to read more about them. Next to the coherence state, the number of entries from each chakra is displayed. This number represents the number of entries you will receive after analysis of a particular chakra. By default, this value is set to three entries; you can adjust it in the Advanced Settings. Now, you have the option to analyze the automatically preselected 3 Chakras by tapping “Continue” or you can return to the dashboard.

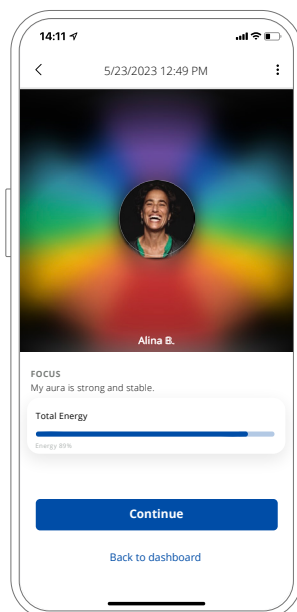

### Analysis results

The results will be shown after the second analysis is completed. You will be shown the entries with which you or the client have the highest resonance, see **Figure 5.7**. Below each entry, you can see the values for the relevance, intensity and potency parameters. Tap on one of these tags to get a short explanation about them.

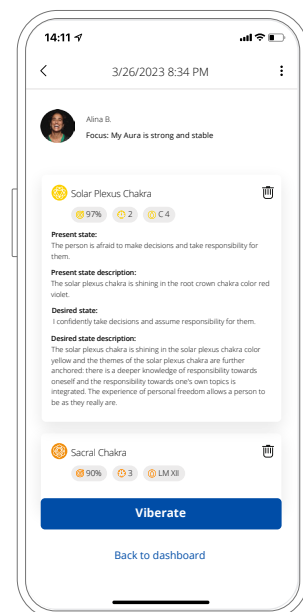

On the analysis result screen, you can choose to vibrate the list into the Information Field and go back to dashboard. More options can be found in the 3 dots menu in the top bar, such as export to PDF.

**Figure 5.6.1:** Aura analysis preparation view

**Figure 5.6.2:** Chakra energy analysis results

**Figure 5.7:** Chakra database analysis results

### 5.3. Coach

With the Coach module you can perform analyses in the Information Field for many different areas of life, with the aim of finding information to improve them and harmonize them in the Information Field.

When performing coaching analyses, you determine your own focus text. You can write one of your own or select one of the provided focus texts, see **Figure 5.8.1**. For more information about this module, click on the info icon in the top bar.

#### Analysis

To start the Coach analysis, tap on the “Start analysis” button. During the analysis, you focus on achieving the optimal analysis result for you or your client. You will hear a tone after the analysis is completed, provided that your mobile device is not muted.

After the analysis is completed, the analysis result list is displayed. The number of displayed topics depends on whether you use the Personal Coach or the Success Coach module, see **Figure 5.8.2** and **Figure 5.8.3**.

**Personal Coach Topics:** Self-worth, Emotional balance, Personal relationships, Family relationships, Social relationships, Spirituality

**Success Coach Topics:** Self-worth, Emotional balance, Personal relationships, Family relationships, Social relationships, Spirituality, Goals, Potentials, Finances, Career

The topics are illustrated in the form of a wheel. The topic with the most potential for improvement is automatically preselected, yet this selection can be changed: Just tap on the radio button or activate the toggle in the topic information pop-up. You can either choose to continue to the next screen or go back to dashboard.

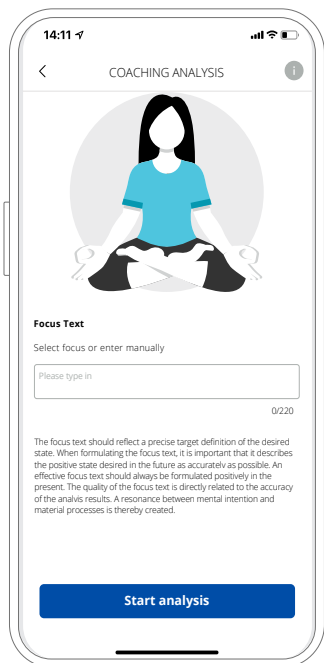

Figure 5.8.1: Coach analysis focus text

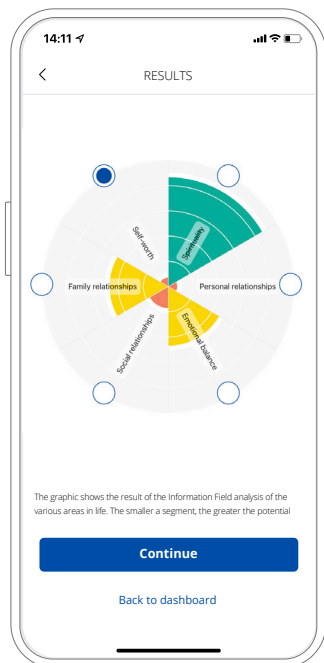

Figure 5.8.2: Personal Coach topics

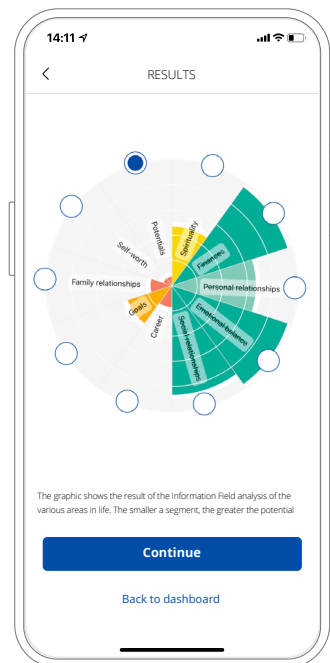

Figure 5.8.3: Success Coach topics

After continuing, you will see the databases pertaining to your selected topic, see **Figure 5.8.4**. You can now change the number of results via the tags - two results are automatically pre-selected (see **Figure 5.8.5**) - or find more information about the database entries when you click on the card itself, see **Figure 5.8.6**. To start the analysis, tap on the “Start Analysis” button.

In the analysis results view (see **Figure 5.8.7**) you will find additional information and options in the three dots menu in the top bar on the right, such as export to PDF. Beneath each entry you can see the values of the relevance, intensity and potency parameters. Tap on any of the items to get a brief explanation of it.

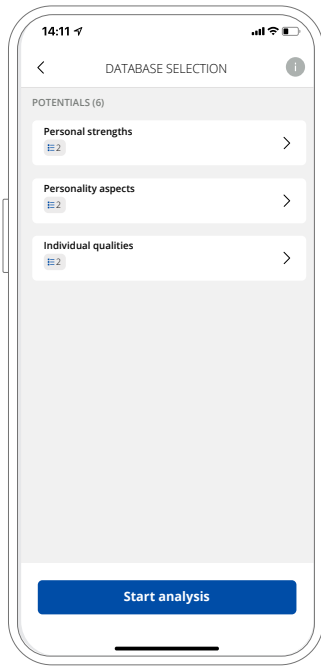

Figure 5.8.4: Coach database selection

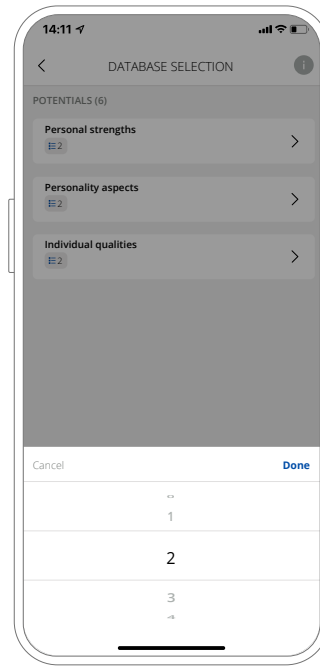

Figure 5.8.5: Number of results

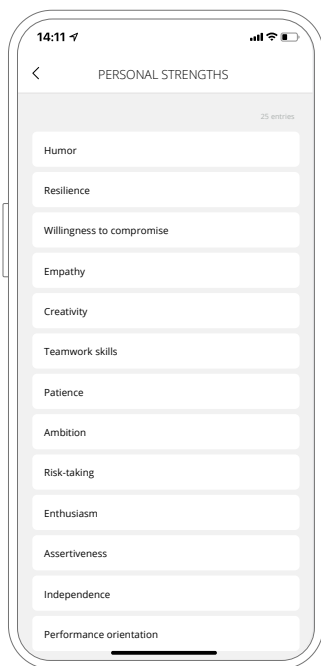

Figure 5.8.6: Coach database entries

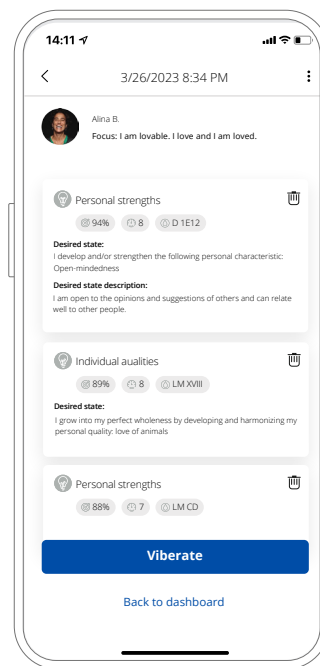

Figure 5.8.7: Coach analysis results

# 6. Vibrate

To vibrate the harmonization list into the Information Field tap the “Vibrate” button. The transmission duration is set to 1m 20s 635z by default, see **Figure 6.1**. To change the transmission duration, tap the > icon next to the pre-selected duration, see **Figure 6.2**. You can select a manual transmission duration (hours, minutes, seconds) or one of the available standard options, which are:

891z	17s 959z	6m 2s 39z	4h 17m 44s 437z
1s 888z	38s 55z	12m 47s 133z	9h 6m 8s
4s	1m 20s 645z	27m 5s 499z	
8s 476z	2m 50s 860z	54m 10s 997z	

These default options are based on a formula proposed by Geesink & Majier with 12 discrete frequencies per octave with the base frequency 256 Hz, which is note C in John Herschel’s musical scale and used for coherence.

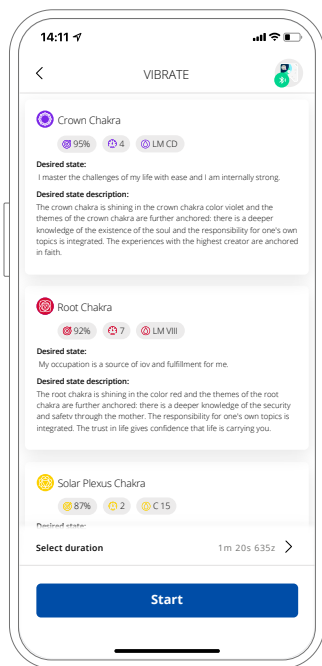

Figure 6.1: Harmonization duration

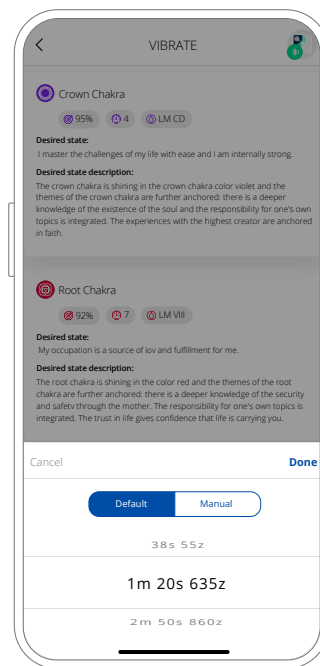

Figure 6.2: Duration selection

After selecting the preferred harmonization duration, tap “Done” and the vibration of the positive information of the analysis list into the Information Field starts, see **Figure 6.3**. You can stop the vibration by tapping the “Stop” button or tapping the < button on the top left corner. Once the vibration is finished, you will be shown the vibration completion screen where you can choose to go back to the client or vibrate the list again, see **Figure 6.4**.

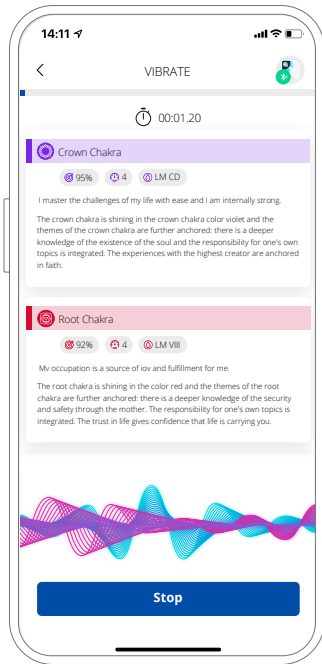

Figure 6.3: Vibration in progress

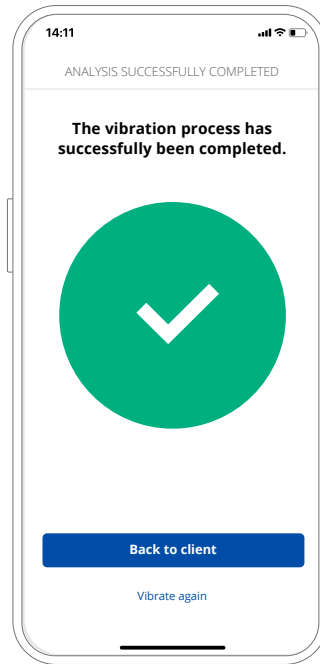

Figure 6.4: Vibration completed

# 7. History

The History tab allows you to see the history of previous analyses from all modules for yourself or for a selected client.

## General history view

The general history shows you the history of analyses from all modules. To access this, tap on the “History” tab on either the Me dashboard or select a client and then tap the “History” tab on the Clients dashboard, see **Figure 7.1**. The history is sorted in a weekly view. Alternate between different weeks by tapping the < or > buttons above the lists. If you click the blue text, a selector opens to choose a specific date. To access a list, tap on the entry, where you can also directly start a vibration.

## Module history view

The module history view shows you the history of analysis lists for a selected module; tap on the module card to access it. Alternate between different weeks by tapping the < or > buttons above the lists. If you click the blue text, a selector opens to choose a specific date. To access a list, tap on the entry, where you can also directly start a vibration.

In the Resonance modules, you can select the database history view (see **Figure 7.2**) and select a specific program or database by clicking on the blue text between the brackets (see **Figure 7.3**).

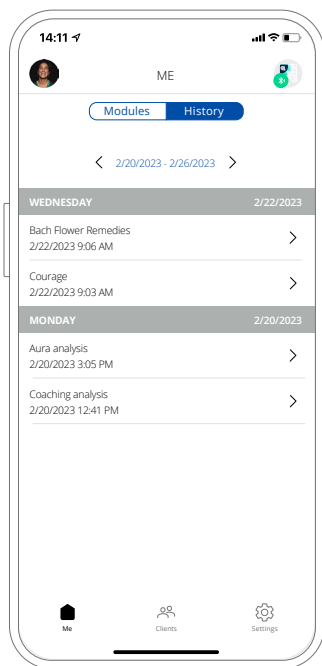

Figure 7.1: General history

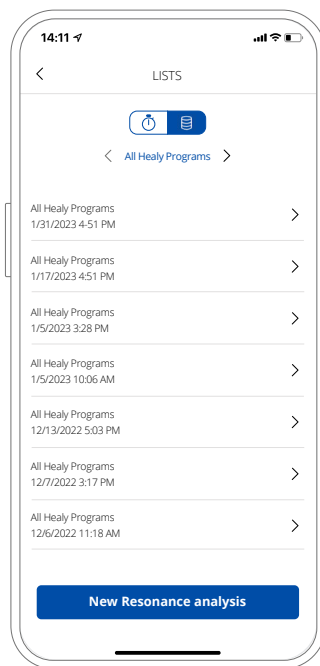

Figure 7.2: Resonance history databases

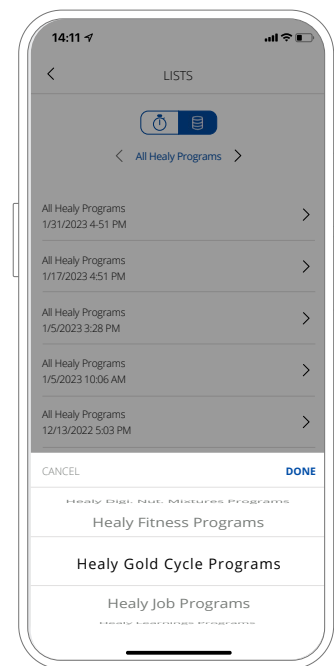

Figure 7.3: History database selection

# 8. Connecting a Healy device

Firstly, make sure that your Healy device is fully charged and that it is not already connected to another Healy App or mobile device. You will receive prompts to connect to the Healy device in the HealAdvisor Analyse App whenever a Healy device is needed to perform an activity (e.g., perform an analysis, record a vibration etc.). The initial prompt will ask you to make sure that both Bluetooth on your mobile device is enabled and that your Healy device is turned on, see **Figure 8.1**. If this is your first time connecting the Healy device to the app, you will be asked to give permission to the app to access Bluetooth and location data. The Healy device should be placed close to your mobile device in order to connect. After the search, you will be shown a list of available Healy devices in your area, alongside their serial numbers, see **Figure 8.2**. Choose the Healy device that you wish to connect to.

To connect to another Healy device, tap on either the icon on the top right corner of the Me Dashboard or the My Healy menu in Settings, see **Figure 8.3**.

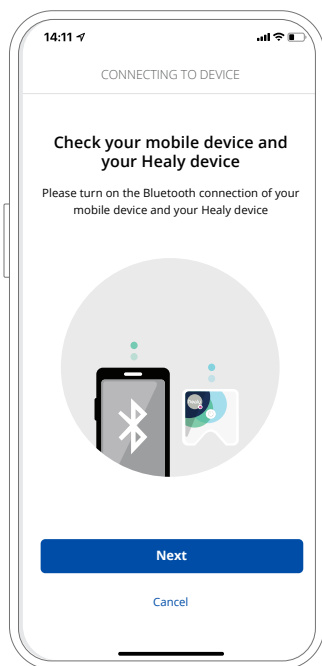

Figure 8.1: Connection screen

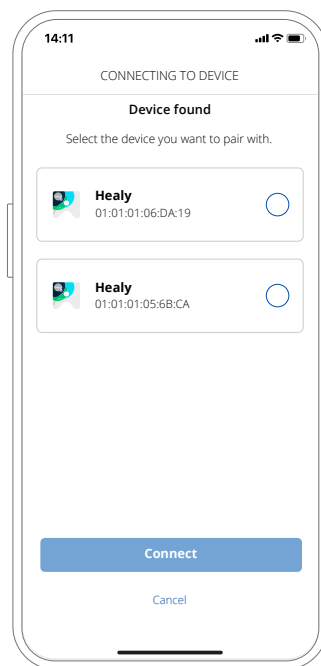

Figure 8.2: Device connection screen

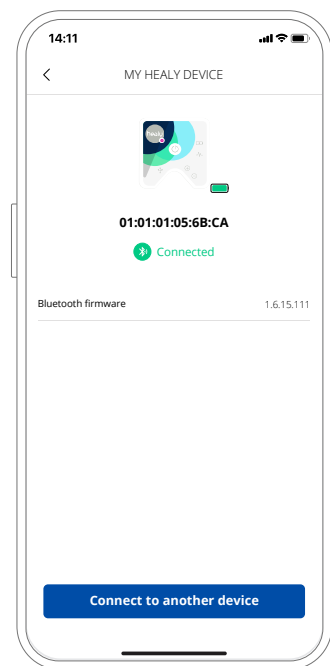

Figure 8.3: Device screen

# 9. The Settings Menu

The Settings menu can be accessed via the “Settings” icon in the bottom navigation on the right side. It contains the following menus: Account, My Healy, Language, Advanced Settings, Manual, Privacy Policy, Terms and Conditions, Consent sensitive data, Imprint, Send Feedback, App version (see **Figure 9.1**).

## Account

In the “Account” menu, you can view and update your current account information, including your profile photo, vibration recording and personal information, see **Figure 9.2**. You can also log out of the HealAdvisor Analyse App at the bottom.

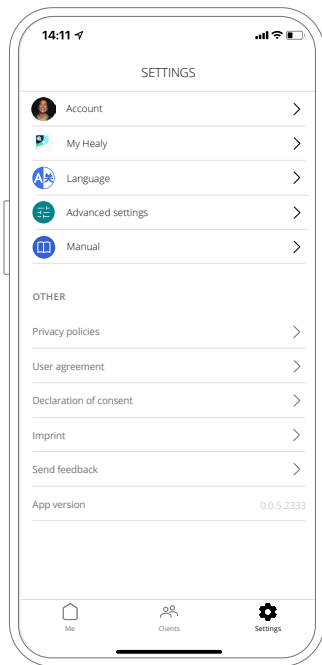

Figure 9.1: Settings menu

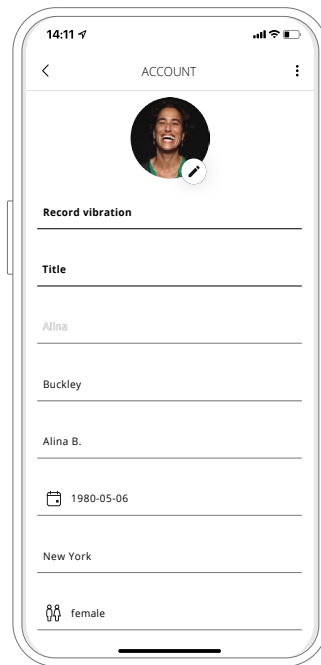

Figure 9.2: Account profile

### My Healy

In the “My Healy” view, you can find information about your Healy device, such as battery life, serial number, connection status and Bluetooth firmware. You can also connect to another Healy device.

### Language

In the “Language” menu, you can choose your preferred app language, see **Figure 9.3**.

### Advanced Settings

In the “Advanced Settings” menu, you can activate advanced functions and options of the app, see **Figure 9.4**.

### Select Number of Analysis Results for Chakra

Change the default number of results you want to receive when performing Aura analysis, see **Figure 9.5**,

Figure 9.3: Language selection

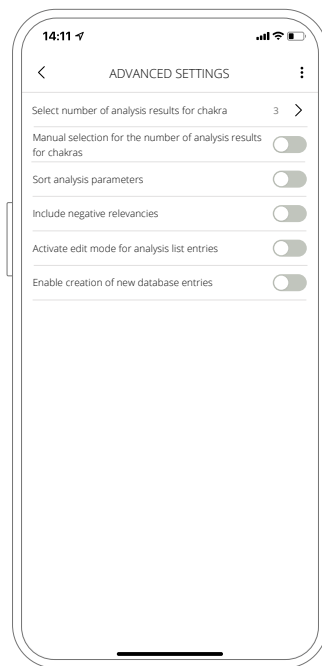

Figure 9.4: Advanced settings

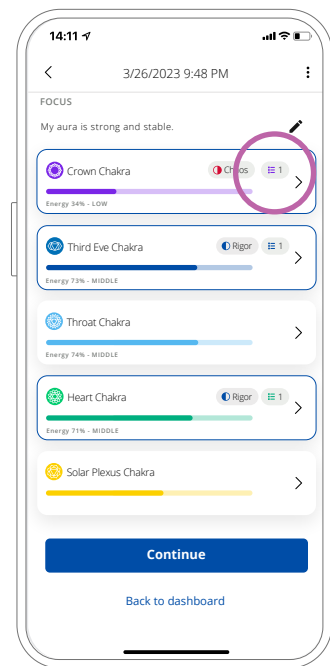

Figure 9.5: Number of chakra analysis results

**Manual Selection for the Number of Analysis Results for Chakras**

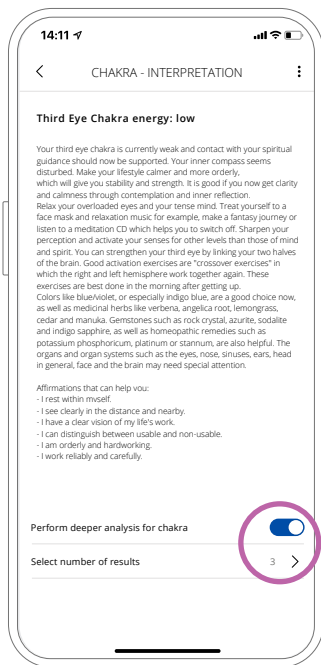

Three chakras are automatically preselected for the first analysis. If this advanced setting is activated, the value can be changed in the interpretation view, see **Figure 9.6**. To access it, click on the respective Chakra card. With this option activated you can also change the focus text beneath the Aura photo.

**Sort Analysis Parameters**

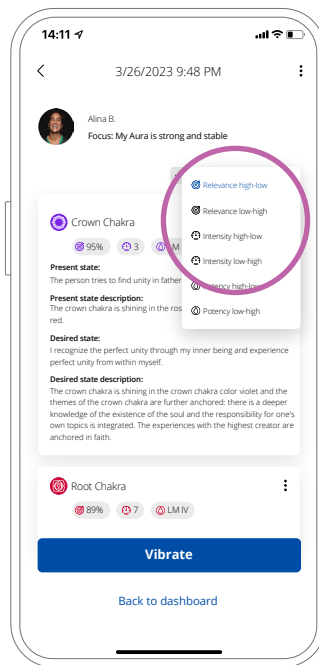

By default, the analysis parameters are sorted by Relevance high to low. This can be changed in the tag that will be displayed once activated, see **Figure 9.7**.

**Include Negative Relevancies**

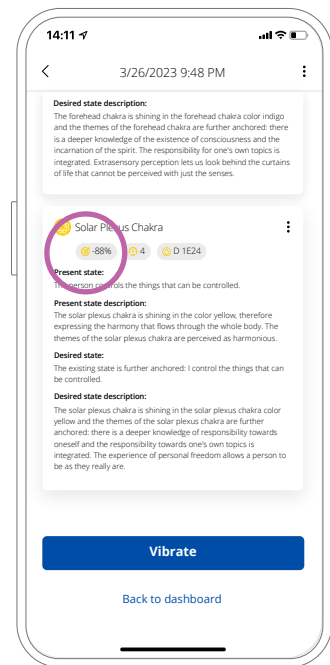

If this option is enabled, the results will also contain negative relevancies. This can be set for all modules except the Resonance modules, see **Figure 9.8**.

**Figure 9.6:** Select number of analysis results for chakra

**Figure 9.7:** Sort analysis parameters

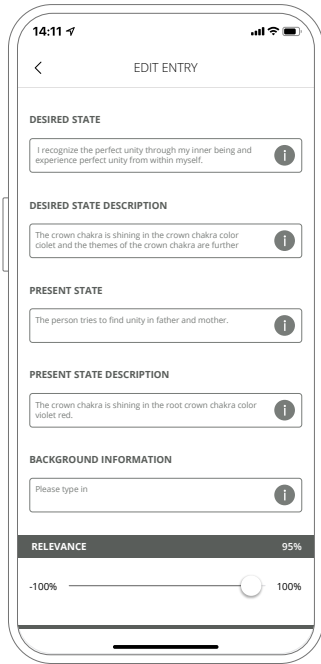

**Figure 9.8:** Include negative relevancies

**Activate Edit Mode for Analysis List Entries**

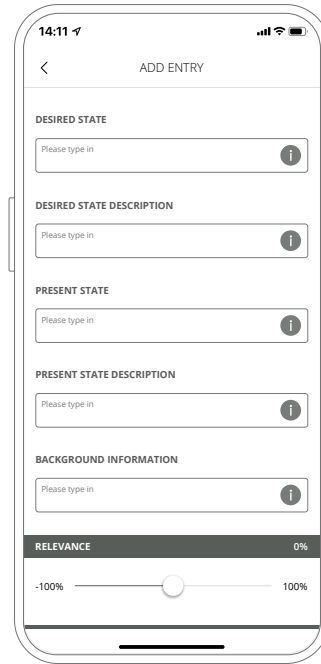

If activated, you will see a 3 dot menu in every result card (except Resonance results) that gives the option to edit the according result, see **Figure 9.9**.

**Enable Creation of New Database Entries**

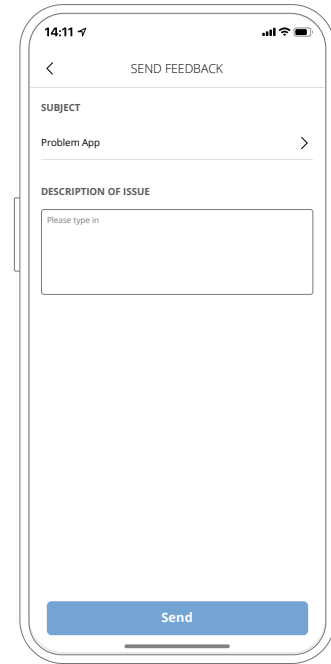

Once activated, the result view of all modules (except Resonance) will display an additional tag to create your own database entries within the list, see **Figure 9.10**.

**Figure 9.9:** Edit entry

**Figure 9.10:** Add entry

**Figure 9.11:** Send feedback

**Privacy Policy**

In this menu, you can see the Privacy policy for Healy Apps.

**Consent Sensitive Data**

In this menu, you can see the consent for Healy applications.

**Send Feedback**

In the “Send Feedback” menu, you can send feedback about the HealAdvisor Analyse App, see **Figure 9.11**.
